

# Methods to Implement Objectives (Separately or in Combination)

- Vary Salinity Objectives Based on San Joaquin River Hydrologic Year-Type (Figure 3 WQCP).
- Share Responsibility Among Entities Shown to Impact Southern Delta Salinity.
- Phase Implementation of Objectives Based on Schedules For When Methods Will be Affective.
- Measure Compliance Using a Composite of Values from Multiple Monitoring Stations in Area.
- Protect through a Narrative Objective.

# DWR Summary

- **SWP/CVP Exports Alone Do Not Cause Degradation of Southern Delta Salinity.**
- **Modeling Results Show that Exports and/or Increased Sacramento River Flows Alone Can Not Effectively Control Southern Delta Salinity.**
- **Investigations of Water Quality Requirements Specific to Soils and Crop Water in Southern Delta Are Needed.**
- **SWRCB Staff Should Continue to Meet with Interested Parties to Work Toward Resolving Issues.**
